

Business Continuity & Disaster Recovery

**Has your organisation planned for a disaster?
Could your company continue trading during and following a disaster?
Do your customers have confidence in your ability to continue?**

Jovasi Technology's business continuity and disaster recover planning services can help your organisation plan for the worst case scenario to ensure it survives a disaster.

Business Continuity Planning

The Business Continuity Plan (BCP) is a set of documents that covers ways to plan for, and maintain critical business functions, before, during and after a disaster. We can help develop your customised BCP.

- ☒ Identify risks to organisation
- ☒ Business impact analysis
- ☒ Implementing safeguards
- ☒ Testing & training procedures

IASME Certification

IASME Consortium

The IASME certification includes policies & practices allowing you to identify potential risks to your organisation.

From

+VAT

ISO 22301

An industry standard framework for developing a business continuity plan.

Disaster Recovery

Disaster Recovery (DR) is focused on what happens after a disaster., and tend to focus more on the technical side of the business, including areas such as data backup and recovery, and computer systems.

- ☒ Identify risks to organisation
- ☒ Business impact analysis
- ☒ Implementing safeguards
- ☒ Testing & training procedures
