

JOVASI TECHNOLOGY LIMITED

VULNERABILITY SCAN SERVICE

Details

Vulnerability scanning is the process of **discovering**, analysing, and reporting on **security flaws** and **vulnerabilities**. Scans are conducted via automated vulnerability scanning tools to identify potential risk exposures and attack vectors across an organisation's network, cloud infrastructure, hardware, software, and systems.

Our **Vulnerability Scan Service** is based on industry leading suppliers, and has been designed to help organisations of all sizes ensure that their systems are secure against vulnerabilities, and is available as either a remote agent or onsite appliance.
